Special Issue

Linking Landscapes, Landsliding, and Ecosystem Diversity and Functioning: New Insights from Remote Sensing

Message from the Guest Editors

Articles may address but are not limited to the following topics:

- Remote sensing before the formation of landslides.
  - Relationships between land-cover and land-use and the size distribution of landslides.
  - Relationships between biodiversity and landslide occurrence.
  - Interactions among biophysical factors, ecosystem structure, and landslides.
- Remote sensing after the formation of landslides.
  - Vegetation recovery on landslides—from cover and NDVI to biomass.
  - Variation in vegetation recovery as a function of landslide size and landscape characteristics.
  - Variation in functional diversity among landslides.
  - Soil formation in areas affected by landslides.
- Landslides and ecosystem fluxes.
  - Mobilization and transfer of organic matter and nutrients among landscape compartments.
  - Linkages between hillslopes and stream systems.
- Landslides and ecosystem services.
- Landslides and human cultures.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail
Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
