

Special Issue

Remote Sensing of High Winds and High Seas

Message from the Guest Editors

This Special Issue focuses on the remote sensing of the ocean, ocean surface and atmosphere related to extreme weather. This includes remote sensing in or below the storm, as well as remote sensing of phenomena generated by a severe storm. It covers remote sensing techniques, processes determined from remote sensing and operational applications of remote sensing.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.
