

Special Issue

Big Data in Remote Sensing for Urban Mapping

Message from the Guest Editors

In this Special Issue, submissions in a broad range of “Big Data in Remote Sensing for Urban Mapping” related research and applications are encouraged.

Topics may include but are not limited to:

- Urban big data processing, analysis and management;
- Multisensor and multiresolution data analysis/validation for urban mapping;
- Machine and deep learning for urban dynamics characterization;
- Land-use and land-cover change monitoring for urban areas;
- Large-scale 2D and 3D urban modeling;
- Urban planning with big data evaluation and assessment;
- Inference of environmental variables (e.g., socioeconomic indicators, population density, life-quality indicators, air pollution) for urban dynamics characterization;
- Interactive platforms for public access to scientific results on urban mapping.

Guest Editors

Dr. Marian-Daniel Iordache

Prof. Dr. Begüm Demir

Dr. Claudio Persello

Deadline for manuscript submissions

closed (29 February 2020)

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
