

Special Issue

Remote Sensing for Agriculture in the Developing World

Message from the Guest Editor

We would like to invite you to submit a manuscript to this Special Issue of Remote Sensing highlighting new techniques, applications and/or results of implementing Earth Observations in monitoring and analyzing agriculture in the developing world. More specifically, we are seeking publishable research in using satellite data along with satellite-derived and modeled products to identify or estimate cropped area, crop yields, and/or production in the developing world. Along with the direct analysis of these products, we also look forward to submissions highlighting the impacts of agricultural shortfall in the developing world. We think this special issue will highlight the value of remote sensing in these locations, and push the state-of-the-practice for agricultural monitoring in these vulnerable areas.

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
