

Special Issue

Remote Sensing of Dynamic Permafrost Regions

Message from the Guest Editors

We are pleased to announce a Special Issue in the journal *Remote Sensing* on “Remote Sensing of Dynamic Permafrost Regions”. We solicit manuscripts that use the multitude of remote sensing platforms and sensors available for describing permafrost region characteristics and dynamics. We welcome submissions that focus on multiple spatial and temporal scales as well as the integration of permafrost region field studies with remotely sensed data. We are particularly interested in submissions that deal with ice-rich permafrost landscapes and quantification of thermokarst and thaw-related landscape dynamics. Contributions that demonstrate the development of new techniques, data products, and/or highlight the challenges of remote sensing in permafrost regions are also encouraged. Please don't hesitate to contact us in regards to your potential submission to our special issue focused on “Remote Sensing of Dynamic Permafrost Regions”.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
