Special Issue

Earth Observation with AVHRR Data and Interconsistency

Message from the Guest Editors

We are celebrating a 40-year legacy of land observations in the solar spectral range at moderate-to-coarse spatial resolutions starting back in the 70s with Landsat; the 80s with the advance very high resolution radiometer (NOAA/AVHRR); and continuing with the moderate resolution imaging spectroradiometer (NASA/MODIS), the visible infrared imaging radiometer suite (Raytheon/VIIRS), and, for example, the ESA Copernicus suites. In this Special Issue, we will compile state-of-the-art research that addresses multi-temporal and/or multi-sensor studies focusing on the solar spectral range, and working on the inter-consistency of these sensors. Please see the keywords to select the area of your subscription. Review contributions are welcome. **Keywords**

- Calibration/validation
- Data harmonization
- AVHRR products
- Inter-consistency
- Spectral adjustment
- Time series
- Long-term records
- Reviews

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail
Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
