

Special Issue

Understanding the Movement Ecology of Wildlife on the Changing Planet

Message from the Guest Editors

This Special Issue calls for contributions that use remote sensing tools and/or datasets to monitor and comprehend the movement of wildlife, biologging biodiversity, ecological research, and conservation science. The Special Issue will also promote the use of remote sensing to advance the theory of Movement Ecology, as well as relevant methodologies, and equipment. We invite researchers from across the world and across scientific disciplines to share their research articles, reviews, and case studies that address challenges related to biological diversity and ecosystem services through the use of remote sensing technology. In so doing, we aim to bridge the gap between movement ecology and conservation practices while raising awareness of the achievements and challenges inherent in remote sensing within the biological sciences.

Guest Editors

Dr. Kunpeng Yi
Dr. Hengcai Zhang
Dr. Eli S. Bridge

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
