

Special Issue

Land Degradation Assessment with Earth Observation (Third Edition)

Message from the Guest Editor

This third volume of the Special Issue on “**Land Degradation Assessment with Earth Observation**” invites original research contributions that explore degradation processes across a range of ecosystems, including drylands (arid, semiarid, and dry-subhumid zones), temperate rangelands, grasslands, woodlands, peatlands, and tropical forests. We welcome studies conducted at any spatial or temporal scale, and are eager to publish scholarship addressing both rapid and gradual degradation dynamics. Submissions employing time series analysis to detect and characterize declines in land productivity are particularly encouraged. Furthermore, we welcome papers that apply the SDG Indicator 15.3.1 framework for monitoring land degradation.

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
