

## Special Issue

# Editorial Board Members' Collection Series: Advanced Integration of Eddy Covariance Measurements with Remote Sensing, Climate, and Ground-Truth Data

### Message from the Guest Editor

The main goal of the Editorial Board Members' Collection Series is to showcase articles that emphasize the advanced integration of ground-based measurements covering vegetation, soil, climate, evapotranspiration (ET), carbon dioxide (CO<sub>2</sub>) fluxes, and additional greenhouse gas (GHG) fluxes with remote sensing data, analysis methods, and modeling. Relevant papers dealing with the link between CO<sub>2</sub> fluxes and ET, as well as water-use efficiency, will also be considered.

### Guest Editor

Prof. Dr. Alfredo Huete

School of Life Sciences, University of Technology Sydney, Ultimo, NSW 2007, Australia

### Deadline for manuscript submissions

closed (26 May 2024)

## About the Journal

### Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
