

Special Issue

Remote Sensing for Land Cover/Land Use Mapping at Local and Regional Scales: Part II

Message from the Guest Editors

This Special Issue calls for submissions presenting new conceptual frameworks and novel remote-sensing approaches addressing the above-mentioned challenges, new or improved geospatial tools for extracting local and regional land-use and land-cover information from multiple remote sensing data sources, and sectoral and interdisciplinary research. Review papers presenting the status and progress, as well as the remaining challenges, are also welcomed.

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.
