

Special Issue

Oceans from Space V

Message from the Guest Editor

In the last half century, satellite observations have become a cornerstone of all planetary sciences and of our efforts to understand and sustainably manage the earth. Major new developments have been achieved in ocean observations, to the point that many aspects of modern oceanography have been revolutionized by the unprecedented capabilities offered by orbital remote sensing. No other technology allows gathering information about marine variables and processes, at suitable space and time scales, like satellite observations do. Ocean exploration and environmental trend monitoring, coupled ocean and atmosphere forecasting, marine resources management, maritime spatial planning: the list of current or potential applications is virtually endless. The Special Issue aims to collect in a single publication the best papers presented at the 5th “Oceans from Space” Symposium (held in Venice, Italy at the *Scuola Grande di San Marco* on 24–28 October 2022).

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
