

## Special Issue

# Remote Sensing and Geospatial Analysis in Urban Environments in the Big Data Era

### Message from the Guest Editors

Remote sensing techniques have experienced rapid development in recent decades, and the advancements in remote sensing technologies have accelerated our understanding of urban environments. In the era of big data, the availability of multisource remote sensing data with diverse spectral, spatial, and temporal resolutions presents opportunities and challenges for geospatial analysis and the comprehensive understanding of urban environments. The objective of this Special Issue is to explore the challenges and opportunities in exploiting the potential of remote sensing and geospatial analysis applications in urban environments in the big data era. Topics of interest include, but are not limited to, the following:

- Urban environment classification and change analysis from multi-source data;
- Application of new sensors (e.g., UAV, SAR, and LiDAR) in urban environment analysis;
- Urban growth and urbanization modeling;
- New innovative algorithms (e.g., machine learning) in modeling urban environments;
- Human–environment interactions in urban environments;
- Sustainable urban development;
- Urban air, water, heat, population, and energy consumption, and their dynamics.

### Guest Editors

Dr. Wenliang Li

Department of Geography, Environment, and Sustainability, The University of North Carolina at Greensboro, Greensboro, NC 27412, USA

Dr. Xiaoma Li

College of Landscape Architecture and Art Design, Hunan Agricultural University, Changsha 410128, China

### Deadline for manuscript submissions

closed (31 August 2025)

## About the Journal

### Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

### Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
