

Special Issue

Urban Deformation Monitoring using Persistent Scatterer Interferometry and SAR tomography

Message from the Guest Editors

Our capability to monitor deformation using satellite-based SAR sensors has increased substantially in the last years, thanks to the availability of multiple SAR sensors and the development several data processing and analysis procedures. This Special Issue is focused on the deformation monitoring in urban areas based on two techniques: Persistent Scatterer Interferometry (PSI) and SAR tomography (TomoSAR). The Special Issue targets collecting the latest innovative research results related to at least one of the above technique. These can include new data processing algorithms and procedures, results based on new types of SAR data, and the development of innovative urban deformation monitoring applications. **Keywords**

- Satellite-based Synthetic Aperture Radar,
- Differential Interferometric SAR,
- Persistent Scatterer Interferometry,
- SAR tomography,
- Deformation monitoring,
- Urban deformation monitoring,
- Monitoring applications,
- Cross-comparison,
- Validation.

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
