

Special Issue

Radar Remote Sensing for Agriculture

Message from the Guest Editors

The launch of ESA's Sentinel-1 mission heralded a new era in radar remote sensing for agriculture. The availability of open, global, SAR data at unprecedented spatial and temporal resolution offers new opportunities for agricultural applications. This Special Issue aims to present state-of-the-art research in radar remote sensing for agricultural applications. Contributions are invited from across the spectrum of radar remote sensing for agriculture including but not limited to new sensors, new processing techniques, scattering theory, retrieval approaches, field experiments and airborne campaigns, data fusion and assimilation. New insights from the fields of scatterometry, SAR, PolSAR, PolInSAR and radar tomography are welcome. Contributions relating to operational use of radar observations for decision-making, and the generation of services provided to farmers, food producers and other stakeholders in agricultural production are particularly welcome.

Guest Editors

Prof. Dr. Susan Steele-Dunne

Dr. Francesco Mattia

Dr. Heather McNairn

Dr. Thuy Le Toan

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
