

Special Issue

Remote Sensing of Vegetation Phenology

Message from the Guest Editors

We are delighted to announce this Special Issue on the phenology of terrestrial vegetation. Phenology is the variation of recurrent key stages in the plant life cycle, linked to environmental changes. By extension, it also includes the mean seasonal cycle of relevant biophysical and biochemical quantities and their temporal and spatial changes. Remote sensing is a major player in this science, and we welcome all contributions related.

Prof. Kamel Soudani

Guest Editors

Dr. Fabienne Maignan

Dr. Natasha MacBean

Dr. Koen Hufkens

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
