

Special Issue

Estimation of the Surface Solar Irradiance Using Remotely Sensed Data

Message from the Guest Editors

The Special Issue aims to highlight latest contributions from research that address all aspects of SSI estimation using remotely sensed data, ranging from scientific fundamentals up to applicative needs. In addition, this issue will highlight the latest scientific and technological developments in this field of study. Manuscripts on all aspects related to estimation of the SSI using remotely sensed data are therefore welcome, focusing on models, methods, validations, and data products, to gain insight on the current research status. Paper topics may include (but are not limited to) the following:

- High-resolution solar resource assessment;
- Cloud and aerosol effects;
- Short-term and intra-day SSI forecasting through assimilation of remotely sensed data;
- Corrections for 3D cloud effects;
- Modeling approaches;
- Separation models;
- Site adaptation techniques;
- Spatial-scale mismatch of remotely sensed data;
- Urban environment irradiance modelling based on remotely sensed data.

Guest Editors

Dr. Edoardo Geraldini
Dr. Panagiotis Kosmopoulos

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
