

Special Issue

Urban Sensing Methods and Technologies II

Message from the Guest Editors

In recent years, the emergence of the Internet of Things (IoT) and advancements in sensing technologies have led to a huge quantity of data that flow into the digital twins of our built environment and urban systems. Today, cities across the globe have deployed a myriad of sensors, enabling us to better understand urban environments and empowering advanced analytics solutions for decision makers and urban managers. Furthermore, there are various sensor deployment strategies, such as drive-by sensing for creating dense spatial and temporal datasets, remote sensing, stationary sensing, and hybrid sensing approaches. This Special Issue aims to explore the state-of-the-art methods, technologies, and systems in urban sensing applications, alongside advancements in modeling and analysis of urban systems for various smart city use cases.

Guest Editors

Dr. Paolo Santi

Dr. Amin Anjomshoaa

Dr. Priyanka Nadia DeSouza

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
