

Special Issue

Geodetic and Remote Sensing Observations in Tibet, Xinjiang and Siberia for Climate and Environment Change Studies

Message from the Guest Editors

We are pleased to invite you to submit your latest research results to this Special Issue on “Geodetic and Remote Sensing Observations in Tibet, Xinjiang, and Siberia for Climate Change Studies” of the open access journal, Remote Sensing. This is the second in the series of Special Issues launched by the journal to use geodetic and remote sensing observations to study issues related to climate and environmental changes in the region covering Tibet, Xinjiang, and Siberia (TibXS). Manifestations of these changes in this region are fast glacier melts, abnormal lake level changes, steady rises of temperature, and disrupted rain patterns, among other phenomena. These changes can be detected by sensors such as satellite altimeter, GPS, GRACE and InSAR. This Special Issue welcomes papers dealing with data collection, processing, and interpretation that can lead to detecting climate and environment-related changes in Tibet, Xinjiang, and Siberia.

Guest Editors

Prof. Dr. Wenbin Shen

Prof. Dr. Cheinway Hwang

Prof. Dr. Xiaoli Ding

Prof. Dr. Hao Ding

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
