

Special Issue

Advanced Technologies for Position and Navigation under GNSS Signal Challenging or Denied Environments II

Message from the Guest Editors

The previous Special Issue “Advanced Technologies for Position and Navigation under GNSS Signal Challenging or Denied Environments” was a great success. This second volume aims to provide a platform for researchers to publish innovative work on advanced technologies for position and navigation under GNSS signal-challenging or denied environments. Specifically, we invite contributions concerning the following topics:

- GNSS multipath and NLOS identification, mitigation or correction;
- Weak GNSS signal tracking and position determination;
- GNSS interference and spoofing detection;
- LiDAR/Visual SLAM;
- MEMS inertial measurement unit;
- Atomic Interferometer Gyroscope and Accelerometer;
- Indoor position;
- Multi-sensor integration and fusion;
- Micro-Technology for Positioning, Navigation, and Timing.
- Control theory and cooperative navigation.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
