

Special Issue

The Applications of Remote Sensing, Machine Learning and Deep Learning in Frozen Ground Regions

Message from the Guest Editors

This Special Issue aims at studies covering different applications of remote sensing, machine learning and deep learning in the frozen ground, including the seasonally frozen ground and permafrost. Topics may cover anything from the related frozen ground study in the point-regional-hemisphere scales. Hence, algorithm, applications, simulations in frozen ground study, among other issues, are welcome.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.
