

Special Issue

Earth Observation Using Satellite Global Images of Remote Sensing (2nd Edition)

Message from the Guest Editors

The recent growing availability of satellite remote sensing imagery is becoming increasingly important as more and more satellite imagery is made available from various sensors, even for free, and new groups of satellites are put into orbit to allow global analyses. The same applications are continuously expanding: today they enable land cover and land use mapping (specifically, detection of urbanization, also at global level, monitoring of cultivated land in order to detect water stress and desertification, and in order to direct crop operations); they also are employed for detecting and monitoring air, land and sea pollution, and for fighting forest wildfires. The Previous Special Issue “[Earth Observation Using Satellite Global Images of Remote Sensing](#)” was a great success. We are pleased to invite you to contribute to new Special Issue in subjects related to the journal scope. This Special Issue also aims to explore the recent progresses of in the field of satellite Remote Sensing and possible further developments.

Guest Editors

Dr. Giuliana Bilotta

DICEAM Department, University “Mediterranea” of Reggio Calabria, 89122 Reggio Calabria, Italy

Prof. Dr. Jon Atli Benediktsson

Faculty of Electrical and Computer Engineering, University of Iceland, 102 Reykjavik, Iceland

Deadline for manuscript submissions

31 December 2025

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
