Special Issue

Advances in Hyperspectral Data Exploitation

Message from the Guest Editors

The aim of this Special Issue is to publish new ideas and findings in hyperspectral data exploitation. Specifically, the following areas are of particular interest.

- Developing new ideas and techniques: Anomaly detection, subpixel target detection; Band selection, dimensionality reduction, data compression; Compressive sensing; Low rank and sparse representation; Unsupervised learning, active learning, deep learning; Data/sensor/information fusion; Endmember finding, extraction, variability; High performance computing; Hyperspectral image classification; Hyperspectral unmixing;
- Algorithm design, architecture, and implementation: Real-time processing; Parallel processing; GPU/FPGA;
- Applications of hyperspectral imaging: Agriculture including detection of diseases, pesticide residuals for produces and crops; Environmental monitoring including toxic wastes, water pollution, oil spills, and sewage; Forest and plantation including species detection and classification.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peerreview process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
