Special Issue

Novel Advances in Aquatic Vegetation Monitoring in Ocean, Lakes and Rivers

Message from the Guest Editor

This Special Issue aims to collate recent advances in remote sensing based methods applied to ocean, river and lake vegetation characterization, including submerged and emergent vegetation, floating-leaf and free-floating plants. Sub-topics:

- Emerging technologies for vegetation mapping;
- Uncertainty and accuracy of remote sensing techniques for vegetation characterization;
- Comparison of existing methods for vegetation mapping and characterization;
- Up-scaling/down-scaling of vegetation mapping and characterization methods;
- Development of tools (analytical/interface) to report vegetation risk along rivers and catchments;
- Ecosystem science based applications of monitoring aquatic vegetation;
- Regulatory based applications of monitoring aquatic vegetation;
- Novel monitoring techniques to quantify vegetation changes over time;
- Optimization of monitoring/sampling programs for vegetation mapping, assessment and characterization;

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail
Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
