

Special Issue

Advances in Remote Sensing for Archaeological Heritage

Message from the Guest Editors

The year 1999, when the launch of the first high resolution satellite sensor, IKONOS, was achieved, consisted of a landmark for the, henceforth, development of remote sensing and the ever-growing exploitation of its capabilities. During these 17 years, significant technological improvements have been made, both in space sensors, as well as in other non-contact remote sensing technologies, providing new tools for scientists to aid in archaeological research, as well as to analyze built heritage monuments and sites. This Special Issue invites research and review articles related to current and novel practices of remote sensing and non-invasive investigation, analysis, and monitoring methods. The issue aims to cover existing research and future trends of remote sensing, covering the full spectrum of topics, techniques, time spans, and global applications, intended for archaeological heritage.

Guest Editors

Prof. Dr. Diofantos G. Hadjimitsis
Dr. Athos Agapiou
Dr. Vasiliki Lysandrou

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
