

## Special Issue

# Geospatial Analysis and Remote Sensing Applications in Coastal Environments

### Message from the Guest Editor

This special issue of Remote Sensing will focus on the latest remote sensing approaches to understanding the coastal environment. We invite manuscripts from practitioners, academics and the public sector that address (1) instrumentation (2) image processing and (3) integration with GIS to getting a better understanding of coastal processes. These include, but are not limited to: sea level rise, pollution, over-fishing, storm prediction and monitoring, determination of property rights, post-hurricane damage assessment and long-term coastal erosion.

### Guest Editor

Prof. Dr. Scot Smith

School of Forest Resources & Conservation, University of Florida,  
Gainesville, FL 32611, USA

### Deadline for manuscript submissions

closed (30 August 2021)

## About the Journal

### Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
