

Special Issue

Image Processing and Spatial Neighbourhoods for Remote Sensing Data Analysis

Message from the Guest Editors

In this Special Issue, we welcome methodological contributions in terms of novel spatial information extraction/modeling algorithms as well as their recent applications to relevant scenarios from remote sensing imagery. We invite you to submit the most recent advancements in (but not limited to) the following topics:

- Mathematical morphology (e.g., morphological filters, attribute filters, etc.) for the analysis of high-resolution remote sensing images;
- Image operations based on spatial neighbourhoods;
- Textural, structural, and semantic feature extraction;
- Operational methods for incorporating spatial information of high-resolution data;
- Object-based image processing;
- Semantic understanding and analysis.

Guest Editors

Dr. Wenzhi Liao

Prof. Dr. Pedram Ghamisi

Dr. Lianru Gao

Prof. Dr. Jocelyn Chanussot

Deadline for manuscript submissions

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
