

Special Issue

Remote Sensing of Inland Waters and Their Catchments

Message from the Guest Editors

To compile existing research using remote sensing techniques in the field of water body/catchment mapping, we would like to invite submission including, but not limited to:

- Exploring the relationships between bio-optical properties and biogeochemical parameters of inland water systems
- New developments in assessment and monitoring of water quality and status indicators of inland waters using remote sensing
- Linking remote sensing of inland waters with water resources management and modelling
- Linkage RS with in-situ data and wireless sensor networks
- Assessment of catchment characteristics using remote sensing in the context of water quality and aquatic ecosystem research
- Remote sensing for quantifying land use change and intensity in catchments
- Semantic Web for linkage catchment management and water remote sensing informations

Guest Editors

Dr. Angela Lausch

Dr. Jan Bumberger

Prof. Dr. Natascha Oppelt

Dr. Karsten Rinke

Deadline for manuscript submissions

closed (31 December 2020)

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
