

Special Issue

Landscape Ecology in Remote Sensing

Message from the Guest Editors

This Special Issue aims to summarize the applications of traditional remote sensing, meanwhile deepening the knowledge of emerging platforms and techniques in the studies of landscape ecology. We encourage the submission of manuscripts that address the following, but are not limited to, topics in understanding landscape patterns, ecological processes, and their interactions:

- Aboveground biomass estimation
- Biodiversity investigation
- Species habitat and distribution mapping
- Landscape pattern mapping, analysis, and implications
- Application of LiDAR, imaging spectroscopy and other emerging techniques

Guest Editors

Dr. Jie Dai

Center for Global Discovery and Conservation Science, Arizona State University Tempe, Tempe, AZ 85281, USA

Prof. Dr. Li An

Department of Geography, San Diego State University, San Diego, CA 92182, USA

Deadline for manuscript submissions

closed (31 January 2023)

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
