

## Special Issue

# Remote Sensing for Maritime Safety and Security

### Message from the Guest Editor

Maritime safety and security is a critical goal in every political agenda. If they are not guaranteed, in-country stability and international relationships are threatened too. An accurate and real-time monitoring of seas and oceans is highly required to provide relevant organizations, governments and agencies with data and tools to support decision-making processes. Remote sensing technologies, techniques and processing solutions can support a safe navigation, the control of maritime traffic and borders, the detection of illegal activities, the prosecution of responsible parties, the marine environment safeguard. Researchers in the field are invited to contribute to this special issue on Remote Sensing for Maritime Safety and Security with innovative and game-changing remote sensing solutions (in the technologies, techniques or data processing) in any of the maritime applications mentioned above.

Dr. Raffaella Guida

## About the Journal

### Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
