

## Special Issue

# Analysis of Multi-temporal Remote Sensing Images

### Message from the Guest Editors

This Special Issue on “Analysis of Multi-Temporal Remote Sensing Images” aims at publishing sound work improving the state-of-the-art in the following (but not exclusively) aspects of multitemporal information extraction: multitemporal images pre-processing (calibration, correction and registration techniques); multitemporal data harmonization, multitemporal image/time series analysis (classification, trend analysis, regression); mining in multitemporal data/time series; change detection; multitemporal data fusion; validation approaches for multi-temporal data analysis; etc. Any kind of data (optical passive sensor images, active SAR images, low to VHR resolution images, multi- to hyperspectral data, multi-to hyper temporal data) can be considered, as well as any kind of application (climate change; agriculture, cryosphere, biodiversity, land-cover and -use dynamics, forestry, disaster/damage assessment, etc.).

---

### Guest Editors

Dr. Francesca Bovolo

Dr. Giampaolo Ferraioli

Prof. Dr. Turgay Celik

## About the Journal

### Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

---

### Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
