

Special Issue

Ocean Radar

Message from the Guest Editors

The objective of this Special Issue is to provide a forum for ocean radar researchers to present their recent advances in the field. Possible topics for this Special Issue include, but are not limited to the investigation of:

- Surface and internal waves
- Sea surface winds and currents
- Coastal bathymetry
- Sea ice and iceberg
- Small vessels
- Oil spill
- Sea surface scattering

using HF surface wave and sky wave radars, microwave nautical radar, and LIDAR.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.
