

Special Issue

Quantitative Remote Sensing Product and Validation Technology

Message from the Guest Editors

On 26–29 June 2021, the national quantitative remote sensing forum was held in Wuhan, China, with more than 130 reports on quantitative remote sensing products and validation technology. This shows that great progress has been achieved in the quantitative remote sensing, including the processing of remote sensing data, the retrieval and product generation of Earth system key parameters, the application of long-time series quantitative remote sensing products, and the validation of remote sensing product. This Special Issue is to collect recent advances, the latest methodologies, and state-of-the-art technologies for quantitative remote sensing products and validation. We hope that this Issue can integrate the latest advances and attracts important research developments in the quantitative remote sensing product generation, and theory and technology in the product validation.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
