

Special Issue

Remote Sensing and Smart Forestry

Message from the Guest Editors

Remote sensing plays a big role in studying and providing management decision support for large spatial extents quickly and effectively, which in a certain way improves the speed of smart forestry construction and improves the level of forestry information management. Technological development, integration and adoption in forestry continues to grow, therefore the application of advanced forestry technology has become the current focus in the research into the development of forestry. The use of remote sensing equipped with different types of sensors in forestry has especially been gaining attention for its different applications in forestry.

The Special Issue entitled “Remote Sensing and Smart Forestry” welcomes papers dealing with smart forestry construction and presents the scientific research achievements of remote sensing applications in the field of forestry in a concentrated way. We kindly invite experts and scholars in related fields to contribute novel and original research to enrich our research community.

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
