

## Special Issue

# Remote Sensing of Biodiversity Monitoring

### Message from the Guest Editors

In this Special Issue dedicated to “Biodiversity Monitoring”, we are calling for innovative, integrative and multidisciplinary contributions aiming to improve the monitoring of biodiversity spatiotemporal change and of its drivers. We welcome studies covering biodiversity’s multiple dimensions in the terrestrial, freshwater and marine domains, especially those combining Remote Sensing/Earth Observation datasets and technologies with biodiversity observation data-streams (from field surveillance time series to citizen-science programs or metabarcoding).

## About the Journal

### Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.
