The Role of Remote Sensing in Sustainable Renewable Energy Exploitation

Message from the Guest Editors

To achieve a sustainable exploitation and an estimation of the capital and operative costs of the different technological solutions, before making renewable energy (RE) and energy efficiency (EE) investments, it is important to couple the potential resources data with the spatial assessment of the energy demand and consumption. In particular, while there are plenty of traditional methodological approaches for evaluating RE potentials, it is still necessary:

- To highlight the role of remote sensing (RS) technology, payloads, and methods to provide reliable tools for RE mapping and their sustainable exploitation;
- To translate in practical recommendation the scientific outcome of the abovementioned process.

Guest Editors

Dr. Antonio Novelli

Dr. Simon Pezzutto

Dr. Pietro Zambelli

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
