

Special Issue

Remote Sensing of Tropical Forest Biodiversity

Message from the Guest Editor

This Special Issue calls for the most innovative work on remote sensing of tropical forest biodiversity, as a means to bring the latest research together to communicate the emerging science and technology to a global tropical forest biodiversity community. For this special issue, I seek papers that focus on improving our ability to measure, map and monitor key aspects of tropical forest taxonomic, functional and structural diversity, as well as new insights gained from doing so. The papers are not limited to remote sensing of plants and their functional and structural traits, but also seeks to include papers that incorporate all aspects of tropical forest biodiversity including animals. The Special Issue will be widely promoted and circulated, thereby increasing general readership of the group of papers presented in an open access journal.

Guest Editor

Prof. Dr. Gregory P. Asner

About the Journal

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and Geographic Information Systems, Peking University, Beijing, China

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
