

Special Issue

Remote Sensing Applications for Interaction between Urbanization and Eco-Environment

Message from the Guest Editors

This Special Issue calls for high-quality and creative review or empirical papers that cover different uses of remote sensing in the interaction between urbanization and eco-environment. Topics may cover the classical analysis of urban development and eco-environmental quality at multi-scales. Hence, articles regarding multi-source data integration, multi-scale approaches, or urbanization process and urban environmental changes, among other issues, are welcome. Articles may address, but are not limited to, the following topics:

- Environmental impacts of urban growth;
- Environmental effects of demographic changes in urban areas;
- Environmental effects of urban land use changes;
- Urban development and water resource use;
- Urbanization and soil pollution;
- Urban expansion and protected areas;
- Urban growth boundary;
- Urban expansion and ecological conservation;
- Eco-environmental constraints of urban development;
- Urban green space and urban development;
- Urban development and climate change;
- Urbanization and biodiversity.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
