Special Issue

Emergency Laparoscopy: Research Advances and Case Reports

Message from the Guest Editor

Laparoscopy plays an increasingly important role in clinical management. A mini-invasive approach reduces postoperative pain and the time to recovery. Laparoscopy is not only widely used in elective surgery, but its diagnostic and therapeutic value in an emergency setting has also been proven. This Special Issue aims to explore the application and impact of laparoscopy in the emergency setting. We welcome submissions in areas including, but not limited to, the following:

- Case reports of laparoscopic surgery in the emergency setting;
- Comparative analysis of the effects of laparoscopy and laparotomy in the emergency setting;
- The impact of equipment, instruments, and surgical techniques on emergency laparoscopic surgery.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Toshio Hattori
1. Graduate School of Public Health, Shizuoka Graduate University of Public Health, Shizuoka 420-0881, Shizuoka, Japan
2. International Research Institute of Disaster Science, Tohoku University, Sendai 980-8577, Miyagi, Japan

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within ESCI (Web of Science), FSTA, and other databases.

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.7 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
