

## Special Issue

# Complex Cases in Diagnostic and Interventional Imaging

### Message from the Guest Editor

Complex cases in diagnostic and interventional imaging often involve unique challenges, requiring a multifaceted approach to accurately diagnose and treat patients. This Special Issue will cover various topics, including oncological imaging, vascular imaging and interventions, gastrointestinal cases, and pediatric imaging. The aim of this Special Issue is to underline the importance of multidisciplinary approaches, the usefulness of advanced technologies, and the importance of patient safety. These complex cases highlight the importance of developing advanced imaging techniques, attaining a thorough understanding of anatomy, and facilitating a collaboration within a medical team to provide the best patient care.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Toshio Hattori  
Emeritus Professor, International Research Institute of Disaster  
Science, Tohoku University, Sendai 980-8577, Miyagi, Japan

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid  
by authors or their institutions.

##### High Visibility:

indexed within ESCI (Web of Science), PubMed, PMC,  
FSTA, and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 21 days after  
submission; acceptance to publication is undertaken in 3.1  
days (median values for papers published in this journal in  
the second half of 2025).
