Case Reports in Obstetrics and Gynecology

Message from the Guest Editor

Rare case reports in obstetrics and gynecology play a crucial role in expanding our understanding of unique and atypical clinical situations. These reports provide valuable insights into uncommon presentations, unexpected complications, and novel diagnosis and treatment approaches. By sharing these rare cases, healthcare professionals can enhance their diagnostic and management skills, ultimately improving patient care. Furthermore, the documentation of such cases contributes to the collective knowledge in obstetrics and gynecology, fostering ongoing learning and potentially guiding future research. For this Special Issue, we welcome interesting rare case reports/interesting images in the fields of different maternal and fetal pathologies, gynecologic oncology, and new imaging methods in obstetrics and gynecology.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Toshio Hattori
Emeritus Professor, International Research Institute of Disaster
Science, Tohoku University, Sendai 980-8577, Miyagi, Japan

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid
by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), PubMed, PMC,
FSTA, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 21 days after
submission; acceptance to publication is undertaken in 3.1
days (median values for papers published in this journal in
the second half of 2025).
