

## Special Issue

# Future Directions in Reproductive Medicine: From Routine Clinical Practice to Current Development

### Message from the Guest Editors

More than 40 years have passed since the first successful in vitro fertilization, and since then there have been remarkable developments in assisted reproductive technology (ART). However, our lifestyle has also changed, accompanied by a diverse way of life, which demands more development of ART. This Special Issue will focus on the current advancement of reproductive medicine in order to meet new expectations from our society. Potential topics include, but are not limited to:

- Tips for successful ART.
- Practical use of AMH for planning infertility treatment.
- ART schedules for working couples.
- Care of adolescent and young adult (AYA) patients with cancer.
- Treatments of gynecologic cancers to preserve fertility.

---
