Case Reports in Oncology

Message from the Guest Editor

Abnormal proliferation of cells in the body, leading to the development of either benign or malignant cancer, can happen in any type of cell. Thus, many types of cancers require unique differential diagnosis and custom treatment options. Despite momentous advances in biological and chemical sciences, early diagnosis and safe and complete eradication of cancer from the human body is still a major challenge. According to the World Health Organization [1], “Cancer is the second leading cause of death globally, and is responsible for an estimated 9.6 million deaths in 2018. Globally, about 1 in 6 deaths is due to cancer.” In this Special Issue, we describe unusual clinical cases of cancer pathologies, challenging diagnosis and treatment. Utilization of new compounds (synthetic and isolated), showing promising anticancer activities and/or superior diagnosis, are also welcome. 1. World Health Organization. About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Toshio Hattori

1. Graduate School of Public Health, Shizuoka Graduate University of Public Health, Shizuoka 420-0881, Shizuoka, Japan
2. International Research Institute of Disaster Science, Tohoku University, Sendai 980-8577, Miyagi, Japan

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), FSTA, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.7 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
