Update on Reproductive Surgery

Message from the Guest Editor

Reproductive surgery involves surgery in the field of reproductive medicine. Reproductive surgeons consist of gynecologists and urologists who specialize in reproductive surgery and are experts in the conservative treatment of reproductive organs in both men and women. Reproductive surgery includes a wide range of operations designed for different purposes. Most operations are carried out to restore normal uterus, tubes, and ovaries. This Special Issue, entitled 'Update on Reproductive Surgery' will present studies in the fields related to reproductive surgery. We are pleased to invite you to contribute to this Special Issue on the potential value and impact of reproductive surgery with original contributions and review articles focusing on recent and related advances in the field, including the latest trends and future developments.
