Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on Food Waste Prevention, Reduction, Reuse, and Recycling. Food waste prevention via food donation and redistribution is among the top priorities set by the food waste management hierarchy and it is included among this millenium's sustainable development goals. Moreover, technological progress in valorisation pathways for specific components of food waste, including novel or significantly improved processes, such as feed from food or bioplastics production, and progress in management procedures are also relevant in this context. Studies reporting on synergies between sectors or individual entities are particularly welcome.

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [GeoRef](#), [PubAg](#), [AGRIS](#), [RePEc](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Nature and Landscape Conservation)
