Message from the Guest Editors

Dear Colleagues,

In this Special Issue, papers on the recovery of value-added compounds for a new use on several fields and application of extracts from organic waste-derived products in crop production and soil management are welcome. The effects of these substances on plant nutrition and defense and their impact on root-associated microorganisms and symbiotic interactions will be specifically stressed. In particular, research papers and short communications will cover the following themes:

- Compounds extracted from compost and digestate and their effects on plant and soil;
- Interaction of compounds extracted from compost and digestate with root-associated microorganisms;
- Novel uses of value-added compounds recovered from agro-industrial wastes;
- Extraction techniques and costs;
- Economic and environmental impacts and social acceptance.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Sciences*) / CiteScore - Q1 (Nature and Landscape Conservation)
