Deadline for manuscript
submissions:

closed (30 April 2018)

Message from the Guest Editors

Dear Colleagues,

Natural resources are becoming progressively scarcer, mainly under the pressure of intensive exploitation. Depleting resources have local and global environmental repercussions and socio-economic consequences. Maintaining healthy and abundant natural resources is vital for the prosperity of present and future generations. Understanding human demand on nature and nature's ability to provide ecological goods and services is fundamental for appropriate policies for the conservation of the environment and natural resources.

The Ecological Footprint captures environmental snapshots of ecosystem resource balances and sheds light on the drivers of ecological overshoot.

Submissions may address the following subjects:

- new insights into the rationale and theoretical aspects of Ecological Footprint methodology to improve its robustness, especially with regard to its capacity to assess human demand for resources;
- integration of the Ecological Footprint with other affordable methods to keep track of both environmental and socio-economic aspects and to assess synergies and trade-offs between them;
- specific signs

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Sciences*) / CiteScore - Q1 (Nature and Landscape Conservation)
