Lambruschini 4a, 20156 Milano,
Italy

Deadline for manuscript
submissions:

closed (30 April 2019)

Message from the Guest Editor

Energy efficiency and the use of renewable energy sources are key goals of energy policies, to achieve a sustainable future. These targets can be reached by acting on the demand and/or supply side; the two sides are highly correlated and multi-disciplinary studies are needed to provide a complete understanding of the topic. For example, when considering the demand side in the residential sector, particular interest is devoted to energy poverty.

This SI aims to collect contributions of the state-of-the-art on field of (a) sustainable and resource-efficient technologies in both the residential and the industrial sectors and of (b) demand side description and modeling. Includes the following topics:

Residential sector

1. Energy efficiency in buildings
2. Energy consumption at the household level
3. Definitions, measures and policy implications of energy poverty

Industrial sector

4. Energy efficiency, energy recovery technologies
5. Energy and material recovery

Multi-disciplinary topics

6. Sustainable development, consumption, products and services
7. Efficient use of natural resources
8. Alternative and sustainable energy resources

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q2 (*Environmental Sciences*) / CiteScore - Q1 (Nature and Landscape Conservation)
