

Special Issue

Biomass Energy Resources: Feedstock Quality and Bioenergy Sustainability—2nd Edition

Message from the Guest Editors

In the current European and global climate, where COVID-19 and the Russia–Ukraine conflict continue to have adverse impacts on relationships between nations on social, economic and environmental levels, renewable energies play a key role in the transition toward a world where sustainability, particularly environmental and energy sustainability, is increasingly viewed as an essential goal.

Biomass properties and sustainability help to define a new way of understanding the quality of biofuels. This change of perspective implies a decisive role in policy decisions, the development of technical regulations and, in general, in the operational choices of biomass supply chain stakeholders. Thus, research efforts are required to exploit the available biomass materials, especially less traditional ones, through the development of innovative production processes and measurement systems, to produce sustainable biofuels and bioenergy. From this perspective, this Special Issue aims to collect research articles or comprehensive reviews focused on the abovementioned topics.

Guest Editors

Prof. Dr. Daniele Duca

Dr. Giuseppe Toscano

Dr. Alessio Ilari

About the Journal

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Editor-in-Chief

Prof. Dr. Benjamin McLellan

Graduate School of Energy Science, Kyoto University, Yoshida-honmachi, Sakyo-ku, Kyoto 606-8501, Japan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Nature and Landscape Conservation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.3 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the second half of 2025).
