

Special Issue

Minerals and Land-Use Planning: Sustainable Narratives and Practices

Message from the Guest Editors

We invite scholars interested in the outlined scope to submit original research articles that engage in-depth with the interdisciplinary driven nature of this topic. This issue aims to attract contributions that (i) debate an integrated perspective on land use by balancing the environmental, social and economic dimensions; (ii) investigate participatory and deliberative approaches to land-use planning dealing with mineral extraction or industrial development related to mineral development/energy transition, (iii) discuss the role of safeguarding mineral resources compared to other land-use options; (iv) examine post-mining land-use in its broader socio-spatial context; (v) debate dimensions of efficient land-use and its environmental, social and economic impacts, (vi) critically land-use conflicts related to mineral development or post-mining, (vii) investigate attitudes towards land-use and the public or societal acceptance about certain practices related to mineral land-uses. We welcome contributions from early career researchers and young scholars as well as critical discussions of the matter from a sustainability sciences perspective.

About the Journal

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Editor-in-Chief

Prof. Dr. Benjamin McLellan

Graduate School of Energy Science, Kyoto University, Yoshida-honmachi, Sakyo-ku, Kyoto 606-8501, Japan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1
(Nature and Landscape Conservation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.6 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2025).
