

Special Issue

Mine Ecological Restoration: 2nd Edition

Message from the Guest Editor

Although the development and utilization of mineral resources have played a huge role in promoting social and economic development, it has also brought serious ecological environmental problems, such as geological environmental problems, ecological environmental problems, and environmental pollution problems. Therefore, it is necessary to explore the environmental governance and ecological restoration of the mining area. On the basis of the Special Issue, Mine Ecological Restoration 1st Edition, we have organized “Mine Ecological Restoration: 2nd Edition”. This Special Issue aims to collect contributions from all aspects of mine ecological restoration research, including (but not limited to) laboratory and field research related to the following aspects: (i) green, safe and environmentally friendly mine ecological restoration technology; (ii) collaborative restoration technology combining multiple methods; and (iii) final recovery of useful substances from plant/microbial biomass or extracts.

About the Journal

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Editor-in-Chief

Prof. Dr. Benjamin McLellan

Graduate School of Energy Science, Kyoto University, Yoshida-honmachi, Sakyo-ku, Kyoto 606-8501, Japan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1
(Nature and Landscape Conservation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.6 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2025).
